Ms. Mimi Smith, Executive Director
Biologists for Biodiversity (B for B)
4767 Risebrough Road
North Bay, ON
C2J 4F7

Dear Ms. Duckworth,

I have received your letter of request for a donation of \$15,000 to help your company promote biodiversity in northern Ontario. After much consideration we regretfully inform you that your request has not been approved. We recognize and appreciate the work that Biologists for Biodiversity does in helping to maintain, support and expand the supply of sustainable ecosystems across Canada. Unfortunately your request does not fall under our company's community sponsorship mandate.

Consolidated Medical's community focus and mandate is one, which promotes and encourages human health involving exercise, healthy eating and medical monitoring. Along with this we strive to help support small, grass-roots charitable groups, dedicated to improving the mental and physical health of Canadians living in communities surrounding the areas where our company operates. Our budget is also one, which is limited in the amount of donations available for various programs. Our company's commitment to other not-for-profit candidates will not allow us to supply B for B with this monetary donation.

Thank you for considering Consolidated Medical Equipment as a potential partner. We wish you continued success and acknowledge you for the significant impact you make in preserving Canada's very important ecosystems.

If you have any further questions or concerns Paul Atkin, the Vice President of Consolidated Medical Equipment is available to speak with one of your representatives. You can contact Paul at 416 429-7373 ext. 234.

Sincerely,

Julie Jones
Chief Financial Officer
